- ◆ May be painted to customers RAL specification
- ◆ Stainless steel and brass bezels available in polished or brushed finish
- ◆ Locates onto standard panel enclosure
- ◆ Supplied pre-fitted to enclosure

**Note:** Illustration shows Discovery panel fitted with fully-flush stainless steel bezel

## Introduction

The CEL range of panels has two bezel options: the semi-flush bezel and the fully-flush bezel. The fully-flush bezel fits flush over the panel back box and replaces the panel door with one complete bezel and door assembly. The fully-flush bezels are available in three finishes, painted to a customers RAL specification, stainless steel and brass. The stainless steel and brass bezels may be polished or brushed finish. Full details of the hole and bezel sizes are included in the relevant panel Application Guide and the leaflet on fully flush bezel fixing details.

## Part Numbers

2603/060	Fully-flush painted bezel for Precept EN 2,4,8 and 16 zone control panels
2603/061	Fully-flush stainless steel bezel for Precept EN 2,4,8 and 16 zone control panels
