

# Semi-flush Bezels

## Key Features

- ◆ Compatible with the full range of CEL panels
- ◆ Painted to match cabinet specification
- ◆ Supplied c/w simple “bolt on” fixing kit
- ◆ 30mm hole overlap

**Note:** Illustration shows Voyager panel fitted with semi-flush bezel

## Introduction

The CEL range of panels have two bezel options: the semi-flush bezel and the fully-flush bezel.

The semi-flush bezel simply bolts to the panel cabinet allowing the bevelled edge only to protrude from the wall. It has a painted finish the same colour as the panel. A 30 mm hole overlap is provided to cover the hole edge.

The hole size required is detailed in the relevant Application Guides.

## Part Numbers

2603/011	Semi flush bezel for Precept EN 2,4,8 and 16 zone control panel
2603/012	Semi flush bezel for Precept EN 32 zone control panel
